Water Commissioner's Report.

We have put in the two extensions to the system, voted last year, at the cost as per items below. Put in eight new connections. Have had plenty of water and the only expense, aside from the above, has been for repairs and parts for hydrants.

Signed,

W. D. FOGG,
C. H. DUTTON,
C. H. DUNCAN.

REPORT OF SCHOOL BOARD.

TO THE CITIZENS OF HANCOCK:

The School Board in submitting its annual report feel confident that the work accomplished in our schools during the past year has been of a high order and has resulted in placing the schools of our town upon a more uniform and systematic basis than ever before.

These improvements have been brought about through two agencies: first, an efficient teaching force, and second, through the effect of the very careful oversight and supervision of our school superintendent, Mr. Cotton.

With one or two exceptions, we have been fortunate in securing good teachers, as the results of their work in the school room so abundantly testify. We believe that those retained are well qualified to assume the responsibility of directing the thoughts and minds of our children towards an education.

As to the superintendent's value in raising our schools to a higher standard of efficiency, we believe that it cannot be overestimated, and feel that the plan has passed from the experimental stage to a condition of actual necessity in our school system.

The boys and girls of today will be the men and women of the near future and it is our simple duty to give them every advantage possible in our educational system that will tend to fit them for the responsible positions of life.

The study of music and singing has been continued in school now for two full years and we feel that the results attained will justify the making of this a permanent feature of our school work.

At the close of our school year last June a class of seven graduated from our schools, having finished the course of study adopted for our common schools, and it shows a commendable spirit of enterprise on the part of both graduates and parents that the whole class has entered high school in other towns.

For several years past the school year for the district has been thirty weeks. This time is insufficient for the pupil to do a year's work as laid out in our course of study as recommended by the State Superintendent.

We would recommend that an appropriation sufficient to maintain at least thirty-four weeks be raised this year.

The most of our surrounding towns have a school year of thirty-six weeks and if we wish to have our children make an equal showing with those from other towns, they should have an equal number of weeks of schooling.

A determined movement is on foot in town to have a higher institution of learning established here. This will supply a long felt need if brought about, but no demand for such an institution will exist unless the common schools of this and surrounding towns are so conducted as to fit their pupils for high school at the usual age for entering such places of learning.

Through the moving into town of several families recently, it was found necessary to again open a school in No. 7 and no doubt this will have to be continued.

Slate black-boards have been put upon the walls of four of our outside school-houses during the year and

other small repairs made as needed. Quite a lot of repairs are needed upon some of the outer school-houses and it is desirable that slate black-boards be placed in the school-rooms at the Center. Thus a larger appropriation is needed than usual for repairs.

On account of opening another school and the cutting down of the estimate presented by the school board at the last annual meeting, the funds in the treasury have become very low and some bills remain unpaid. It is almost imperative that a much larger appropriation be raised at our school meeting this year if even the present number of weeks of school be maintained.

We make the following financial estimates for the needs of our schools for a school year of thirty weeks :

Money required to be raised by law, \$1342 50

To be assessed by Selectmen :

<i>a</i> High school tuition	400 00
<i>b</i> Text book and pupil's supplies	150 00
<i>c</i> Flags and appurtenances	5 00

To be appropriated at school district
meeting :

Salaries of school district officers	100 00
Needed for repairs	250 00
Additional school money needed	1000 00

We take this opportunity of thanking parents and all interested citizens for their co-operation in raising our schools to their present state of efficiency.

The Roll of Honor, Statistical Table, Report of the Superintendent to the School Board and Treasurer's report, follow.

Respectfully submitted,

ELLA F. PERRY,
ELLA A. ROBINSON,
WILFRED M. DAVIS,

School Board.

REPORT OF SUPERINTENDENT OF SCHOOLS.

TO THE HANCOCK SCHOOL BOARD :

I take pleasure in submitting to you my second annual report as superintendent of your schools. The year has been a prosperous one and your supervisor believes that a good amount of progress has been made both on the intellectual side of the development of our children and the physical environment, which is of no less importance than the former. There is much left to do however. The fact that education is in a constant process of change, both in methods of teaching and curriculum, eternally confront one. This is due to several conditions.

But a short time ago only a very small proportion of the pupils reached the same relative state of advancement as the average or normal pupil does today. The reason for this was that the child was given a different kind of education, an education in which technicalities played such an important part of the teacher's work and the work of the text book writer, that only the brighter child succeeded in surmounting the difficulty. Then only the highly selected pupil was allowed to enter the high school. The resultant is obvious. Today eighty-three per cent. of those who graduate from the grammar schools of our State pass into the high school and fifty-one per cent. of those who pass into the high school

graduate. This fact alone represents a great stride in our educational process. It has been accomplished within ten years from date and is an achievement of which New Hampshire may well be proud. It may not be out of place to remark that more pupils, in proportion to population, are graduated from the high school in our State than in any other State of our Union. The high school has now become just as important a factor in our common school system as the primary school was but a short time ago.

The new labor law, requiring the child to be in attendance at school one hundred fifty whole days previous to arriving at the age of fourteen years in order to secure a certificate, serves as another check to hold our children in school until they are sixteen years of age. Those who desire the certificate most are least likely to obtain one, as they are usually the very ones who fail to have the requisite number of days attendance.

As a necessary consequence of these facts the methods of dealing with our pupils have been in a process of change and are bound to change, with a view to fit the child more completely to its environment. The whole type of teaching has been changed from the hair-splitting, dogmatic hearing of recitations, asking of pumping questions and time killing processes to methods of teaching and drilling. Testing is not abolished by the teacher but is reduced to a minimum consistent with thorough work and good progress in the school room.

Much gratification is felt from the fine spirit of co-operation existing among our teachers, the great improvement in the quality of the work of the school room and the progress of the pupils. One of our teachers has been granted a State certificate. Two are from

Normal schools and one a college graduate. The other two are teachers of experience. More has been accomplished in strengthening our teaching force than I had expected.

Our teachers have attempted to create among their pupils a healthy spirit of consideration for the rights of others both at school and about town. We are handicapped in this only by bad examples and false ideals inculcated outside the school room. Parents and town officials are earnestly requested to assist school authorities in carrying out these ideals.

Teachers' meetings have been held for the purpose of discussing methods as well as to illustrate them by actual teaching, to promote an interest in improving the teacher's professional knowledge and to give specific directions in regard to the work of the school room, such as utilizing the black-boards to the fullest extent, requiring accuracy in thought and speech and detailed methods of teaching and drilling.

The usefulness of a teacher as summarized in a recent school report, may be estimated largely, by the way she meets these requirements.

“Her attitude towards life in general and her work in particular, her willingness to harmonize, her refusal to become a tale bearer, a gossip, or a critic.

Her desisting from malicious, unjust criticism of those in authority.

Her ability to inspire, sweeten, broaden and harmonize her class as a whole.

Her ability to command the respect of her pupils even though she may not be popular with them.

Her willingness to grow.

Her ability to broaden.

Her effort to keep out of a rut, to keep sweet and keep moving.

By the eagerness of her pupils, to acquire knowledge (manifested in their interest, application, attendance and deportment.)

By the strength of a class after leaving her."

Cases of scrambling, irregular and slovenly work by the children are particularly to be avoided.

This calls for high ideals and habit forming power on the part of the teacher. Such looseness and carelessness is distressing in the extreme and an earnest effort is being made to eradicate the evil, to the last vestige, in our schools.

Last year considerable testing was done by your supervisor in writing, with the purpose of stimulating this branch of the work as much as possible. After a year's deliberation, the only conclusion which can be arrived at is that a practical system should be adopted.

It should be a system that calls for speed, form and freedom of movement, rather than beauty of writing.

Testing is continued in this subject, as well as others, with the idea of stimulating a healthy competition among the different schools and pupils of the district.

Our children should not in their close application to their books lose sight of what is going on in the world about them. A close observation of the characteristics of the common plants and animals which are about us is a whole education in itself. Persons who possess this power of observation usually have greater acumen in attending to the ordinary duties of life as well as enjoy a keener and broader appreciation of it. A few minutes each week should be devoted to teaching along this line of thought or this subject should be correlated with others.

The work of the school room in general is being brought into closer relation to the program of studies and our different schools are doing more nearly the same work. This work is recorded and placed on file every five weeks. With such a record and grading of pupils a new teacher saves much time by avoiding the repetition of work already done.

The teacher also avoids repeating the same topic too frequently. She is encouraged and directed in doing new and essential work. What may be omitted without injurious results is also pointed out.

The program also adjusts the work of the school-room to the age of the child. Previous to the age of eleven the child does not care to work in the abstract, but enjoys all kinds of memory work and drill in the fundamentals.

So much repetition is often irksome to the teacher but it must be done in order that the child may be properly grounded in the fundamentals. Whatever abstraction the child of this age does acquire, is best obtained by doing a large number of concrete problems and then making it own deduction of the principal involved.

The child has but little power of intense application but must have frequent changes of work. The thinking power is slow and no attempt should be made to give a thorough or technical knowledge of such a subject as memoration, or the technicalities of English grammar.

The reasoning power has not yet manifested itself, consequently compound numbers, bills and notes, interest and problems, involving puzzling situations, should be put over to the grammar school age. From twelve to fifteen the child begins to enjoy the reasoning process and will do a large amount of abstracting. Right

here is the place where the need of a thorough grounding in the fundamentals is felt. If the child is required to do abstract problems at a time when it should have been mastering the foundation of its school work, the child's time has been worse than wasted.

By adapting the work to the age of the child there has been a material improvement in all subjects. The essentials of reading, language, grammar, history, geography, writing, etc., are being emphasized and better taught and the non-essentials are receiving less attention.

Among the books added to our equipment during the past year are Wide Awake Primers, First and Second Readers, Wilson's History Reader for the fourth grade and the Gulick Physiology Readers for the fifth and sixth grades. A set of Curry's Literary Readings, a work of five hundred pages, containing the biography of twenty-two authors and two or more complete selections from each, has been purchased. It is economical as a reader and possesses a high degree of literary merit. Attention should be given another year to histories in the fifth and seventh and eighth grades and reading matter of a supplementary nature.

The blackboards installed in the country schools are of great assistance to efficiency in teaching. They are much appreciated by our teachers and serve to make them more contented in their work. Slate also should be installed in the village schools as the surface of the boards there fail to take the chalk well and cause a constant eye strain, which is injurious to the child's vision.

The seating arrangements of No. 7 school house should be changed and different furniture installed

which is more suitable to the size of the pupils. The hall ways of No. 2 and No. 3 school houses should be repaired.

The consideration and courtesy with which your superintendent has met on the part of citizens and parents and the hearty co-operation of the school board has been of great assistance in his work.

Respectfully submitted,

CARL COTTON.

Auditors.

REPORT OF LIBRARY TRUSTEES.

The Trustees of the Hancock Town Library submit the following report.

Through the generosity of Miss Elizabeth M. Hayward, our fire-place has been furnished with a much needed pair of andirons.

The Reading Room, has been made more attractive by the addition of a deer's head, the gift of Mrs. Hattie Moores Shaw.

We have in a very small way, made provision for the congested condition of the Library, by installing a new stack. We anticipate this will barely provide shelf room for the present.

The Library Endowment Fund, is \$12000.00, in addition to this, there has been saved from our income, from time to time, for a Building Fund, \$1463.24 now on deposit in Peterborough Savings Bank.

Library and Reading Room open Tuesday, Thursday and Saturday from 2 to 5, and from 6 to 9, P. M., legal holidays excepted.

There have been 210 charge cards issued, representing 6894 volumes and 968 periodicals taken out.

The Guest Book shows a record of 176 out of town visitors.

We gratefully acknowledge books from Mrs. T. Morris Brown, Mrs. Henry Tudor, Mrs. Drew, Rt.

Rev. Anson R. Graves, Mr. Thomas S. Perry, Mr. John Vaughan Morrill, Mr. Albert E. Pillsbury, Mr. Albert Bowers, Mr. Duncan Newell, Mr. Robert P. Porter, Mr. David M. Tipton, Ticonderoga Pulp and Paper Co., National Lumber Manufacturer's Association.

Also gifts of periodicals, from Mrs. E. K. Upton, Mrs. Pietersz, Mrs. M. A. Homes, Mrs. M. J. Lindsay, Karl G. Upton, Mr. James T. Weston, Mr. Thomas S. Perry, Mr. Edgar L. Ware.

Number of volumes reported Feb. 15, 1911	5694
Number of volumes purchased by trustees	128
Number of volumes acquired by gift	89
Periodicals bound	14
Whole number Feb. 15, 1912	5911

* Massachusetts Agent for Criminal Investigation

I hereby certify that the returns are correct, according to the best of my knowledge and belief.

EDGAR L. WARE, TOWN CLERK.

TOWN WARRANT.

STATE OF NEW HAMPSHIRE.

To the Inhabitants of the Town of Hancock, in the County of Hillsborough, in said State, qualified to vote in Town Affairs.

You are hereby notified to meet at Town Hall in said Hancock, on Tuesday, the twelfth day of March, next, at nine of the clock in the forenoon, to act upon the following subjects :

1 To choose all necessary Town Officers for the year ensuing.

2 To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation of the same.

3 To choose a delegate to revise the constitution, at a convention, to be held at Concord, June 5th, 1912.

4 To see how much money the town will vote to raise and appropriate for the proper observance of Memorial Day.

5 To see how much money the town will vote to raise and appropriate for the proper observance of Old Home Week.

6 To see how much money the town will vote to raise and appropriate for the suppression of the brown tail moth.

7 To see what action the town will take in regard to State aid for highways and pass any vote relating thereto.

8 To see if the town will vote to put in two catch basins at the top of the hill on Hosley street and cover the hill with sand or gravel, and raise and appropriate money for the same.

9 To see what method the town will take to dispose of the copies of inscriptions on the gravestones in the old cemetery and pass any vote relating thereto.

10 To hear reports of agents, auditors, committees or officers heretofore chosen and pass any vote relating thereto.

11 To transact any other business that may legally come before said meeting.

Given under our hands and seal this twenty-fourth day of February, in the year of our Lord nineteen hundred twelve.

EDSON K. UPTON,
CLARENCE H. WARE,
JOHN E. HADLEY,

Selectmen of Hancock.
